SUMMARY

When I moved to London, I realized that I'm wasting my time on an unfulfilling career as a constructor worker. I remember in high-school one of our assignments was to build an HTML website. I got carried away because I couldn't make it look like as I imagined, so I stayed up late learning about CSS3, so when that urge of changing career come up, I knew which path I want to take. Now I'm looking for a company that's willing to give me the opportunity to learn and grow as a developer. In return, I would offer my full commitment, passion, and I would be a friendly, driven member of the team!

EXPERIENCE

Freelancing — Front-end development

June 2020 - PRESENT

- Taking design ideas and transforming them into attractive, innovative, and successful web pages
- Developing cross-browser and cross-platform compatible solutions
- Improving the quality and appearance of web applications.
