EXPERIENCE

CVCosmos

Sept 2021 – Present

Junior Full Stack Developer

Remote

- Setup a new React front-end application inside Django for better scalability and management
- Created RESTful API endpoints for CRUD operations with Django Rest Framework.
- Updated and maintained staging environment with latest commits and database migrations.
- Developed Python scripts for various tasks such as loading data from CSV or JSON files, creating dummy test data for testing purposes and custom management commands.

CVCosmos

May 2021 – Sept 2021

Part-time Front End Developer

Remote

- Learnt to use different technologies such as Docker, Django, Postgres.
- Incorporated different setting environments for better maintainability and flexibility.
- Wrote technical documentations for different parts of the application.
- Explored ways to visualize graphs and charts using HTML, Javascript, and CSS.

Freelance

Oct 2020 – July 2021

Front End Developer

Remote

- Developed the front end interface of a web application using Vue.js and custom SCSS.
- Worked with Stripe Payment to allow easy payment solution to the users.
- Collaborated with a backend developer using version control systems such as GitLab to organize modifications and assign tasks.
- Integrated SendGrid with Netlify Serverless Functions and created Email templates for contact form and newsletter.
- Utilized an headless CMS where the client could create/manage relational content that then we displayed on a React.js web application.

PROJECTS

Greyhound Race analyser | Python, Selenium, MongoDB

Nov 2021

- Implemented Selenium to create an instance of Chrome in order to scrape the necessary information from a webpage.
- Used Cron to schedule the program to execute automatically every morning so it collects the upcoming races that day.
- Translated an algorithm that can predict the outcome of a race based on the dogs previous performance.

Portfolio website | Vue, GSAP, Netlify, Figma

Oct 2020

- Designed my personal portfolio website using Figma
- Created unique interactions and animations with the Green Socks animation library.
- Turned a Figma design into a live application utilizing Vue.js and hosted it on Netlify.
